

**QUEEN'S UNIVERSITY**  
**APSC 171J – Quiz #2**  
**Wesley Burr**  
**Written: February 13, 2013**

**INSTRUCTIONS**

- This quiz is being written in the tutorial (9:30-10:20am) Wednesday, February 13
- Answer all questions, writing clearly on the sheets provided.
- One mark in each question is for a **fully** correct solution, which **must** be placed in the box provided
- Whenever possible, simplify your solution.
- There are no part marks: you will receive only integer marks for each question.

FOR INSTRUCTOR'S USE ONLY		
Question	Mark Available	Received
1	6	
2	10	
TOTAL	16	

*this sheet left blank*

1. [6 marks] Find the definite integral

$$\int_1^2 t^2 \ln(2t) dt.$$

[5 marks] for process, [1 mark] for final answer in box below)

Final Answer:

*this sheet left blank*

2. [10 marks] Find the volume generated by rotating about the line  $y = -1$  the region bounded by the graphs of the equations  $y = x^2 - 3x + 4$  and  $y = 4 + x$ . Include a clear, large, **labeled** diagram, and state clearly which approach you are using (slices vs. shells).

([2 marks] for diagram, [3 marks] for correct volume integral statement, [4 marks] for solving the integral properly, and [1 mark] for final numeric volume in box on the next page)

*extra space for Question 2*

Final Answer:
